INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US05/06643**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-20 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the steps of computing and applying statics to refraction data, binning and stacking refraction mini-volumes, generating semblance cubes for each refraction data set, comparing the seismic data with historical information, and identifying drilling hazards based on the comparison. The closest prior art dealing with using refraction data did not include the method steps discussed above in determining drilling hazards.

Claims 1-20 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.

The drawings are objected to under PCT Rule 66.2(a)(iii) as containing the following defect(s) in the form or content thereof: The drawings are informal and include hand-written numbers and arrows which are difficult to read. The drawings are too dark to be able to tell which feature of the drawings is being referred to by each reference numeral since the arrows connecting the number to the feature can not be clearly seen.
